Legal Status of the School

The DSND is one of 136 recognised German schools abroad and is therefore authorised to award German qualifications. At the DSND, the Hauptschule and Realschule examinations as well as the German International Abitur examination (DIA) can be taken.

The Federal-Länder Committee for School Work Abroad (BLAschA) is responsible for supervising schools worldwide. Financial, personnel and organisational support is provided by the Central Agency for Schools Abroad (ZfA) on behalf of the Federal Foreign Office.

The school is run by the School Association of the German Embassy School New Delhi, a non-profit organisation registered in Germany. A board of directors elected by the general meeting manages the organisation.

History of the School

The DSND was founded in 1961 in a residential building in Delhi. At the time, it comprised a kindergarten and primary school. In the years that followed, the school had to move several times. It was always housed in repurposed residential buildings until it finally found a more permanent home in 1992 in the embassy building of the former GDR, which was acquired by the Federal Republic of Germany. Since then, the school has been located on federal property and has the status of an embassy school.

It has taken almost 50 years for the school to develop from its beginnings as a kindergarten and primary school to today's school, which is fully equipped for the Abitur. Until then, the DSND had always been a so-called Sek. I school, offering programmes up to Year 10. In 2007, the school received authorisation to set up a sixth form. The first Abitur examinations were held in the 2009/10 school year. In September 2013, the mandatory federal and state inspection took place, in which the DSND achieved outstanding results. Since then, we have been able to call ourselves an 'Excellent German School Abroad'. This result was repeated in the 2022/23 school year. In 2016/17, we were also officially recognised by the Standing Conference of the Ministers of Education and Cultural Affairs as a German school abroad with the right to award Abitur certificates. In the 2018/2019 school year, the school moved to the interim accommodation on the grounds of the Bulgarian Embassy because the old building is being demolished and replaced by a modern new building that meets the requirements of modern education and the special requirements of the Delhi location (earthquake safety, air filtration systems).

Anerkannte Deutsche Auslandsschule

Grade 5 serves as an orientation term. Grade 10 functions as a link: for grammar school students (*Gymnasium*) this is the preparation year of High School (*Oberstufe*) whereas for middle school students (*Realschule*) this is the final year. The Secondary General School (*Hauptschule*) final exams are taken at the end of grade 9, the Middle School final exams after grade 10 and the *Abitur* (*DIA*) on concluding grade 12.

School Curriculum

Teaching from elementary school to high school graduation follows the school's own curricula, which are approved by the Conference of Ministers of Education and Cultural Affairs. The school's own curricula are coordinated with the curricula of German schools in the South and Southeast Asia region, thus enabling students to transfer to Germany, Austria, and Switzerland. They also enable joint final exams and high school graduation exams (regional high school diploma).

Information on Individual Subjects

German

The DSND is a German-medium overseas school and the main language of instruction is German. Therefore proficiency in German is an essential requirement to ensure success in school. Special introductory courses can be arranged for students who do not possess the required level of proficiency in German. Students who have little or no knowledge of German will first receive intensive German language support so that they can participate in regular classes as quickly as possible.

English

Living in New Delhi we are in an English speaking environment. Many of our students were enrolled in English schools. Therefore, English is taught from Kindergarten onwards and continues to play a vital role throughout all the grades. The grades 5 & 6 and 7 & 8 will be taught together. By dividing the students into different ability groups all the students of the lower secondary level (Sek.I) will be offered the necessary support to enable them to work at a level appropriate to their language skills.

French

French is the compulsory second foreign language at DSND. French is taught from grade 6 onwards through to the *Abitur*. New entrants to the school with a different foreign language are given adequate time to achieve the grade appropriate level. During this time they are not graded in this subject. Students who join DSND in 10th grade with no prior knowledge of French can take "French for Late Beginners". These students must continue French until 12th grade. Even in other subjects a time frame could be granted to catch-up.

DEUTSCHE BOTSCHAFTSSCHULE NEW DELHI

German Embassy School New Delhi
Anerkannte Deutsche Auslandsschule

Physical Education

All grade levels of secondary level I and II have two periods of physical education a week. In the hot months (from August to autumn break and after spring break to the end of the school year) swimming lessons will be given

In the primary school three periods of physical education a week are conducted. In a double period during summer, the physical education class turns to a swimming class and the remaining single period is conducted on the school's sports ground. For information on the regulations for physical education classes in the event of high levels of particulate matter pollution, please refer to the information on the website under: Our School/Service/Health and Safety.

Religious instruction / Ethics Lessons

Religious Instruction as well as Ethics is taught at the Primary School. In grades 5-8 Catholic or Protestant Religious instruction or Ethics lessons are taught. Due to organizational reasons the subject Ethics is taught in grades 9 to 12 exclusively.

Focal Points

Media and method curriculum

The media skills curriculum defines the development of media skills from kindergarten to high school. From kindergarten on, the pupils learn step by step how to deal with media in a reflective manner, e.g. The portfolios ("Methoden- und Medienkompetenzen") on method and media skills, which are distributed to all pupils from elementary school onwards, help pupils to assess their abilities and to track their learning success.

Student Based Learning / Project Work

In grades 5-8 the students work on a cross curricular project. At least two subject teachers together with the students plan a common project. The students engage in independent work, teamwork, learn conflict management, how to accept and give criticism, time management, different presentation forms and much more.

Independent collaboration of students and the presentation of the results is a skill acquired by students to practice the competence and a skill to work independently, research the topics and work on the final presentation.

In grade 9 project learning is extended to compulsory participation in public competitions.

Bilingual and Foreign Language Instruction in Geography and History

One of the leaving certificates issued at DSND is the so called German International Abitur Certificate (DIA). According to the examination regulations up to 50 % of the required subjects can be taken in a foreign language. Therefore, the preparation for this starts at the secondary level I. At DSND History and Geography are taught in English and German.

In grades 5 and 6 Geography is taught in German. Basic required vocabulary is also given in English. The same applies for history lessons in grades 7 and 8.

DEUTSCHE BOTSCHAFTSSCHULE NEW DELHI

German Embassy School New Delhi
Anerkannte Deutsche Auslandsschule

In grades 7 and 8 Geography is taught in modules, using English and German, sometimes the languages are used during different phases of the same lesson. The core vocabulary is given in both languages.

The Geography lessons are taught in English from grade 9 onwards.

In History, beginning from 9th grade, lessons are taught in modules in a bilingual sequence.

For those students, newly admitted to the school who need to catch-up on the syllabus, time specific transitional rules exist.

Information and Communication skills and Laptop Classes in the secondary level

We support students' skills in using information and communication technologies by offering regular ITE lessons in grades 5 and 8. However, the school provides primary school students with tablets for use in class as needed. At the end of the first semester there are at least 2 days of intensive sessions for the students in the secondary level I. IT skills involving word processing with the latest software, spreadsheet processing and presentations are taught.

At the end of the second semester the students of grades 5 to 11 are given workshops on three consecutive days. The topics of the workshop revolve around the current issues related to IT such as the use of social networks, internet research, online security etc.

From 9th grade onwards, the students bring their personal laptops. The school provides them with its own closed network.

Inclusion

DSND has, in its internal inclusion concept, determined the basic right of all students to education in a common frame. In the framework of our possibilities we are striving to offer each single student the best individual support and strengthen them in their personality development. The idea and the concept of conclusion apply to all academic branches and cover all school related activities offered.

Support and Integration

At DSND, support and encouragement are fundamental principles implemented in every class. We aim to support students not only academically (cognitive area) but also in psychomotor, emotional and social aspects. Many students have a migration background, come from different school systems and have different academic levels of achievement. Owing to the size of the school the support program is organized on an individual basis. A time frame is agreed upon in which the student is given systematic support to attain the required level. However there is a time limit in which the expected goals must be met.

The primary grades 1 and 2 are offered additional German lessons in the frame of our afternoon activities program and the students of grades 3 and 4 can participate in a correct spelling training.

In Mathematics the school offers students in the lower secondary section needing extra support a double period once a week.

Students who require extra German as a foreign language or second language are provided with small support classes teaching.

DEUTSCHE BOTSCHAFTSSCHULE NEW DELHI

German Embassy School New Delhi
Anerkannte Deutsche Auslandsschule

Students of grades 5-10 who need further help in German (correct spelling and German as a Foreign Language) will receive 1-2 lessons/week special classes. In grades 5-8 as well, in case of lacking German language skills, support by a German as a Foreign Language teacher is possible.

Afternoon Activities

Apart from regular classes the German School New Delhi also offers extra-curricular activities (Arbeitsgemeinschaften). Therefore, the school is in a position to offer an attractive full-day program. A daily lunch service is offered to all students. The activities range from supervised homework (Primary School and lower secondary) to physical education or music courses to other Co-curricular activities like Theater or Parkour. The activity programs are changed and modified each semester. Most activities are free of charge. These activities commence on the first school day.

Supervised Homework

From Monday to Thursday from 14:00 hrs to 15:30 hrs the school offers supervised homework, for which a fee is charged. Primary and secondary students are in separated groups. Registration is done in conjunction with the extracurricular activities. In elementary school, we offer a mandatory study period two days a week, during which the children are supported by an elementary school teacher. Primary students have the choice of combining supervised homework with co-curricular activities. Supervised homework starts in the first week of school. Further information can be found in the section "The First School Week".

Career Counselling

Students from grade 9 onwards are offered career advice to help them make informed decisions about their future after graduation. The skills needed in decision making are covered in the subjects German, English, Geography and History. In grade 9 students learn how to write a CV.

In grade 10 the students undergo for two weeks an internal corporate training program giving them the opportunity to experience the working world. In grades 9-12 the school organizes a career information session. Experts give presentations and explain the qualifications required with a subsequent Q&A session. Finally in grade 12 individual counseling for the students with regards to study and work opportunities is conducted.

Different Sections in Detail:

Kindergarten

Baby-Schnuppen (6 months- 18 months)

Teacher / Child ratio: 1:2

Sternschnuppen/Shooting stars (U3 = 1.5 until 3 years)

Teacher/child ratio: 1:6

Open: Mondays to Fridays, 07:30 hrs to 13:30 hrs.

If desired, children may be picked up at 11:25 hrs.

Pre-School, (children who will start school from the coming academic year)

Teacher/child ratio: 1:8

Open: Mondays to Fridays, 07:30 hrs to 15:30 hrs

- The Kindergarten is bilingual (German/English, total immersion model) The group teams consist of German-speaking and English-speaking teachers.
- If necessary, German language learning is supported by a special German support program "Lernpfad" developed by Dr. Zvi Penner with a GSL/German as a foreign language trained teacher.
- The pedagogical work with the children is laid down by the quality control board for Kindergartens of the German Overseas Schools (ZfA) and regular in-service training seminars are conducted.
- The pre-school children are carefully prepared for school. The Primary school and the Kindergarten coordinate classes together in a school preparation program "*teiloffenen Eingangsbereich*", which involves children from first grade and Kindergarten being taught Physical Education and music together. Primary teachers also teach the pre-school program
- twice a week in the Kindergarten. The language of instruction is German. All this aids the child's transition from Kindergarten to first grade/Primary School. For this program "*teiloffenen Eingangsbereich*" a school curriculum is available for orientation.

Primary School

The elementary school of DSND includes grade 1/2 and grade 3/4, with two grades being taught together. The small school offers students the opportunity to grow and learn together in a trusting atmosphere.

The lessons are based on the German educational plans, the Thuringian curriculum and the educational standards for schools abroad.

We want to accept all students in their individuality. We educate for a social and tolerant cooperation.

We respond to the heterogeneity of the learning groups with different teaching principles:

- Open forms of instruction such as workshop work, station work, daily and weekly schedule work
- self-directed learning, promotion of self-observation and self-reflection
- changing social forms
- learning materials that support individual learning

The language of instruction in the elementary school is German. In order to meet the different requirements of native German speakers and children for whom German is a second language, extra German

Anerkannte Deutsche Auslandsschule

lessons are offered as needed. In most German and math lessons, two teachers teach the class together.

English is taught three hours per week in 1/2 and four hours per week in 3/4. In the 3/4 a second teacher supports the lessons in some hours.

The elementary school, as the link between kindergarten and secondary school, prepares the transitions in close cooperation with the preschool and the secondary school.

A primary school teacher teaches the preschoolers two hours a week. In music and physical education, the preschoolers and grade 1/2 are taught together by a kindergarten teacher and a primary school teacher. At the end of the primary school period, there are taster lessons in the fifth grade.

Primary School Timetable:

*Classes held with Pre-School

Subjects	Grade 1/2	Grade3	Grade 4
German	7	8	7
Mathematics	3	5	5
English	3	4	4
Social Studies	2	3	2
Physical Education	3*	3	3
Music	2*	2	2
Art	2	2	2
Religious Instruction/Ethics	1	1	1
Indian Studies	1	1	1
Learning time	2		2
Total	29	29	29

Secondary Level I

Orientation Stage

Grade 5 at the DSND has been conceived as an orientation phase. Here classes actually take place at the grammar school (*Gymnasium*) level.

At the end of grade 5 recommendations are made by the teaching staff concerning the choice of opting for Secondary General School (*Hauptschule*), Middle School (*Realschule*) or Grammar School (*Gymnasium*). However, ultimately it is the parents' choice that prevails when streaming students in grade 6.

Grades 6-10

All students of grades 6-10 are taught together in a common classroom. However, the lessons are conducted differentiated according to the academic affiliation of the students. French, the second foreign language at DSND, could be replaced by the subject "Science Studies" by students streamed in Real- and Hauptschule.

Fax: 0091 11 26112195

DEUTSCHE BOTSCHAFTSSCHULE NEW DELHI

German Embassy School New Delhi
Anerkannte Deutsche Auslandsschule

A switch between the different school streams is then possible up to the end of 8th grade if French as second foreign language was taken and satisfactory subject grades are achieved. The initiative to change school streams can be taken by the parents as well as by the teaching staff (class conference). The final decision rests with the teaching staff and a recommendation is issued.

Upon passing the "Realschule" exams with qualification for the "Gymnasiale Oberstufe", a student can repeat 10th grade and take the Abitur-exam at the end of grade 12.

Timetable for grades 5 - 10

Subjects	Grade 5	Grade 6	Grade 7	Grade 8	Grade 9	Grade 10

Secondary Level II

At the DSND upper secondary classes in the grammar school are taught a prescribed set of subjects remaining in their homeroom group. The option to choose either an advanced or basic course is not available at German overseas schools. The students must choose subjects between French or Chemistry and between Art or Music.

Completion of the German International Abitur Examination (DIA) is the main focus of the DSND. This exam has been specially developed for German overseas schools with the objective of strengthening the international character of the overseas schools. The examination is basically the same as a normal German *Abitur* from the legal point of view and is also recognized as such worldwide. However, when it comes to the contents, the DIA offers the additional option of completing the course in a foreign language (in our case English). There are three written and two oral examinations.

It is compulsory to take a written German examination, however students are free to choose the others from their set subjects.

Subjects prescribed for grades 11 and 12

	Subjects	11th grade	12th grade
	German	5	4
	English	4	4
Choice on demand	French	4	4

General Information

Admission

The Principal decides over applications for admission. The main criteria for admission to the school is the ability to follow classes conducted in German.

We are a small school and do our best to accommodate for each individual student. The admission of children with severe learning difficulties requires individual planning and reflections together with the parents, as to enable an integration and support according to the individual needs.

The school and admission fees are regulated by the current table of fees and are payable half-yearly.

Report Cards and Transfer Rules

Students in grades 1 and 2 are given report cards at the end of each school year, whereas students in grades 3 to 12 get their report cards half-yearly and at the end of the school year. Report cards for primary students contain competence based feedback. From grade 3 onwards grades are given additionally.

Report cards at the secondary school level (grades 5 to 12) include a comment on the school stream, i.e. Secondary General School (*Hauptschule*), Middle School (*Realschule*) or Grammar School (*Gymnasium*). The annual report card contains a comment on transfer into the next grade. Transfer rules can be found and read under the transfer regulations for Primary School and grades 5 to 10 on the school's website. Grades 11 and 12 are regarded as one unit. Students who leave school during this period are issued transfer certificates and students who have passed a school leaving exam are given school leaving certificates.

School Textbooks and Class Materials

The school textbooks being used are ordered from Germany by the school and handed out to the students according to their requirements during the first few days of school. Parents are given a list of the books that have been handed out and a bill for the same together with the school fees of the first term. The DSND website contains the list of school books and stationary/class materials for all grades. Most of the stationary can be bought in New Delhi except for notebooks with special lines which can be purchased from the secretariat.

Primary School students carry their material during the first week at school. Most of it remains in the class room in an individual area kept for this student. We request the parents to label the school material.

School Regulations

With the admission to the school parents and students oblige themselves to acknowledge all school regulations (regulations pertaining to the transfer into the next grade, grade placement rules, school rules etc.). These regulations can be downloaded from the school's homepage.

The School Day

The DSND offers a full-day program. Most of the compulsory subjects are taught during the morning periods so that the children and students are free to choose from a host of programs as part of their extra-curricular activities in the afternoons. During lunch-break students can enjoy a hot lunch at a reasonable rate (prepared by our school cooks).

Colleagues

There are 18 dedicated and qualified German speaking teachers with qualifications from Germany. Eight teachers and the Principal are sent and paid by the German government. The school also employs seven qualified Kindergarten teachers and one care taker and five staff members in the administration section.

Location and Building: Temporary Accommodation at the Embassy of Bulgaria

The school building is, until the completion of the new construction, housed at the former chancery office of the Embassy of Bulgaria at EP 16/17 Chandragupta Marg, Chanakyapuri, further offering a central location with an advanced state of security.

You can reach us easily while passing the Austrian Embassy on Chandragupta Marg and turning right at the Primus Hospital (the unnamed alley / road bearing no name...). At the corner to Dr. Jose Rizal Marg you will find the separate entrance to the school.

Bus Service:

The school owns school buses and presently runs 1 bus line. The bus runs 4 times daily: In the mornings to school and at 13:15 hrs, at 15:30 hrs and at 17:00 hrs back home again.

The routes are determined every year at the beginning of the school year according to the respective needs, but may change during the school year. The pick-up point won't necessarily be at the front of the house. In some cases, a drop-off point must be agreed upon. Apart from the driver there is a bus attendant in the bus. Children from the age of 3 can use the school bus with the consent of the Head of Kindergarten. In cases where your child will not use the bus due to sickness or private transportation, we request you to inform us early by sending an e-mail to sekretariat: sekretariat@dsnd.org. Should

Anerkannte Deutsche Auslandsschule

your child want to visit another child after school and take the bus with this student, we need early written information to make sure that we have this seat available at that time on that route.

Sick Leave and Leave of Absence

If a student is sick and unable to attend school, parents must inform the school office and the class teacher/Kindergarten teacher through our IServ platform under 'absences' before 07.30 a.m. Medical certificates can also be sent to the class teacher or the secretariat by e-mail.

Class teachers can grant leave of absence up to one day. Requests exceeding one day must be made in writing to the Principal at least two weeks prior to the requested date. The student is solely responsible for catching up with any missed work. If a student falls sick during class he/she must inform with the teacher of the following period. The secretariat will then organize a pick up for the student.

In case of absences from the Kindergarten, information about not using the school bus and absences from CCA, parents are requested to inform through IServ platform under cancellation.

Security

Security at the school's entrance gate is carried out by the school's own personnel who are assisted in the task by employees of a professional security agency recommended by the German Embassy. All Students will be issued with an ID card and two pick-up cards with their photographs. Parents as well as private drivers, friends or relatives who pick up students will be issued the ID cards from the school on application, which will display the photos of the children at the back and they must wear the ID cards visibly at all times on school premises/school buildings. Visitor pass - all visitors to the DSND must be registered in advance with the head teacher / administrative manager; visitors identify themselves with an ID at the gate opposite the guards; visitors receive a visitor pass and return it when leaving the school grounds. The loss of the ID must be reported to the secretariat immediately in writing (sekretariat@dsnd.org).

The school has taken out an accident insurance policy for all its students. The policy covers the time when students are in class and also all school-related activities such as class trips or excursions as long as these risks are not being taken care of by the private and individual insurance policies of the parents (principle of subsidiarity).

Lunch

Lunch is offered to all students of grades 1-12 and Kindergarten-children. We are charging a lump sum for the lunch in our invoice for the school fees.

Primary School students who neither visit the supervised homework nor take part in extra-curricular activities have to be picked-up by 14:00 hrs. as after the end of the lunch break no supervision is possible any longer.
